

**WE ENABLE
ENERGY TRANSITION**

GROUP GLOBAL PRESENCE

NEXTCHEM is MAIRE'S company dedicated to **Sustainable Technology Solutions.**

We enable energy transition through innovative technologies within our three business lines: Sustainable Fertilizers & Nitrogen-Based Fuels, Low-Carbon Energy Vectors, and Sustainable Materials & Circular Solutions.

At the forefront of innovation, our company is dedicated to shaping a low-carbon future.

Data as of 31st December, 2024

*The data includes employees, collaborators and sub-contractors

The background features a dynamic, abstract composition of soft, blurred gradients in shades of blue, purple, and magenta. Diagonal streaks of light, resembling fiber optic cables or digital data paths, cut across the frame, adding a sense of movement and modernity.

HOME TO
THOSE WHO
RESHAPE
THE FUTURE

Our technology solutions are designed to make the energy transition happen by slashing the environmental impact of traditional industries, leveraging our consolidated know-how in hydrogen and carbon-capture technologies, transforming waste into valuable resources like chemicals, fuels, and recycled plastic, finding new processes from non-fossil feedstock.

SUSTAINABLE FERTILIZERS & NITROGEN-BASED FUELS

Nitrogen-based solutions

Technology solutions

NX STAMI Urea™

including Ultra Low Energy design and fluid bed granulation technology

Leaders in fertilizer technology, maximizing energy efficiency

NX Stami Nitrates™

Optimizing nitric acid production

NX STAMI Ammonia

Ammonia from low-carbon hydrogen (through ATR or CPO)¹

NX STAMI Green Ammonia™

Futureproof carbon-free ammonia production

SUSTAINABLE MATERIALS & CIRCULAR SOLUTIONS

Valorizing Waste

Technology solutions

NX Circular™

Valorization of waste through gasification and conversion of syngas into hydrogen, methanol, ethanol, or SAF

NX EnerCircle™

Production of bioenergy from waste biomass

NX Replast™

Upcycling rigid plastic waste into valuable products

NX Re™ Suite

Chemical recycling of plastic waste into monomers

LOW-CARBON ENERGY VECTORS

Hydrogen suite, low-carbon fuels and carbon capture, Sulphur recovery and Advanced polymers

Technology solutions

NX CPO™

Catalytic partial oxidation

Small scale hydrogen production through syngas for hard to abate

NX Reform™

Steam methane reforming

Small-medium scale hydrogen production from gas (available with carbon capture)

NX AdWinHydrogen®

Autothermal reforming

Large scale low-carbon hydrogen from gas with high efficiency and capture rates

NX FHYVE™

Reliable and cost-effective electrolysis modules for green hydrogen

NX AdWinMethanol®

Autothermal reforming

Large scale methanol synthesis from gas for a new low-carbon fuel

NX SAF™ BIO

HEFA process, also with pre-treat

Unlocking sustainability of aviation through cost-effective small scale plants

NX Decarb™

Optimizing and integrating core carbon capture unit

NX SulphuRec™

Sulphur recovery

Abate pollutants in refinery and natural gas processing

NX CONSER™ MAN

Sustainable processes for fine chemicals production

NX CONSER™ Duetto

Building a sustainable future through biodegradable plastics

TECHNOLOGY EXCELLENCE STRENGTHENED OVER TIME

Fauser Montecatini pioneers the ammonia production process from renewables.

Stamicarbon is established in the Netherlands, bringing crucial technological and engineering skills. This marks the start of a journey towards global leadership in the fertilizer market.

The Italian engineering company Selas Italia (later known as KTI) is founded. Specializing in high-temperature technologies, KTI brings expertise in customized, advanced solutions for hydrogen and syngas production.

TPI is established, focusing on high-end know-how in planning plants for low-density polyethylene (LDPE) production.

The green acceleration begins: **NEXTCHEM** is launched, spearheading green chemistry and energy transition. The acquisition of **MyReplast Industries** and the creation of **MyRechemical** enhance the Group's position in plastic upcycling and waste-to-chemical technologies.

The "Unbox the Future" Strategic Plan is announced. A new unit lights a new phase in the industrial cycle: **Sustainable Technology Solutions** is formed under NEXTCHEM. Acquisitions of **Conser** and **MyRemono** expand expertise in biodegradable plastic and chemical recycling.

NEXTCHEM continues its growth with the acquisition of **HyDEP** and **GasConTec**. HyDEP pioneers proprietary solutions for green hydrogen production, while GasConTec excels in low-carbon hydrogen, ammonia, and methanol technologies.
